Amounts are presented in millions of Swedish kronor (SEK m). The interim report is unaudited and prepared in accordance with IAS 34. The Group's presentation and functional currency is the Swedish krona (SEK).

Comments from the CEO

“We close 2025 with a strong fourth quarter. Net sales grew 13.8% year on year to SEK 1,240 million and 5.1% sequentially from the third quarter, supported by robust demand across our automation segment and a favourable order backlog. Profit before tax rose 22.3% versus the fourth quarter of 2024 to SEK 148 million,” said the Chief Executive Officer.

The order intake for the quarter amounted to SEK 1,315 million, giving a book-to-bill ratio of 1.06. The automation segment continued to outperform, with organic growth of 17%, while the precision components segment grew 9%. The gross margin was stable at 30.0%. Net debt to EBITDA was 1.2x at the end of the period.

Outlook

For the first quarter of 2026, the Board expects continued sequential growth supported by a healthy order backlog of SEK 2.9 billion. For the full year 2026, the Group targets organic net sales growth of 6–9% and an operating margin above 14%. Management notes some uncertainty from raw-material input costs but expects price adjustments implemented in the fourth quarter to protect margins.
