Management Commentary

The Group recorded revenue of RM2,557.5 million and profit before tax of RM9,558.2 million for the current quarter compared to revenue of RM2,319.1 million and profit before tax of RM698.1 million in the preceding quarter. The significantly higher profit before tax in the current quarter was primarily attributable to the net gain arising from the remeasurement of the investment in Sunway Healthcare Holdings Berhad to fair value upon its listing.

Outlook

Looking ahead, Malaysia's real estate market is expected to remain stable, supported by an accommodative interest environment. The healthcare segment continues to demonstrate strong growth visibility, supported by the Group's disciplined expansion strategy and resilient demand for private healthcare services.
